PROFILE

Motivated BSc Computer Science student at the University of Hull, developing strong programming ability in C# alongside a growing interest in 3D graphics. Comfortable working in teams through coursework, hackathons, and extracurricular projects, with a track record of collaborating under pressure to deliver working software to deadline. Seeking a placement in industry to apply these skills to real-world problems.

SKILLS

Programming Languages: C#, C++, Python, Lua, Rust, CUDA, JavaScript

Technical: Object-Oriented Programming, 3D Modelling - Blender, AI/LLM APIs, Entity Component Systems, .NET, OpenGL/TK, Unity, Monogame, SQL, Unit Testing, AR/VR, Dedicated GPU/CPU programming, Neural networking, Physics simulations and game AI, Photoshop, Illustrator

Organisation: Organised the study of 15 modules and achieved first class results

Team Working: Partook in several team-based projects to achieve shippable products, Game Jams, team-based modules, personal team-based projects

Personal: Teamwork, Leadership, Critical Thinking, Problem Solving

PROJECTS & EXTRACURRICULAR ACTIVITIES

Three Thing Game — Game Jam

- Worked in a small team to design, build, and ship a playable game within a 24-hour deadline, built around three specified themes.
- Practised rapid prototyping, task division, and collaborative problem-solving under time pressure.

3D Modelling

- Proficient 3D modelling skills in Blender and Unity, developing a strong sense of spatial reasoning and attention to detail transferable to software and game development.
- Created 3D models for game development projects.

EDUCATION

BSc Computer Science for Games Programming, University of Hull *September 2023 – May 2026*

- Achieved a first-class Honours degree

A levels, Cardinal Newman College *September 2020 – June 2022*

Computer Science, Mathematics, Graphic Design
